

Indoor
Cycling
Commissaires
Meeting

15-16th December

2012

Artistic cycling; English Version

Peter Vandeberg did welcome all participants and did talk shortly about the past Indoor season. The Worldchampionship was one of the topics. Stated was that still there are to many not necessary „movements“ at the commissaires area. This area should be basicly separated. The hall speaker and IT Commissaire should have „if possible“ places at a „second row“. But most of the times the space does not allow this lay-out. At the next Worlds it seems to be possible to have a place only for the commissaires. The responsible technical delegate for Basel will try to implement the mentioned lay-out. At the Worlds 2012 (Aschaffenburg) places for Commissaires were reservated at the Grand-stands, just behind the commissaires area, but these places had not an easy access. So it was difficult to use them. But it is important to have these places, but with a good entrance from the Commissaires area. Probable the 2013 organization at Basel can consider before mentioned.

During the seminar there were several computer judgings performed using video's which were shot at the Worlds 2012. Due this method a lot of details could be discussed. An idea for the future is to have also a camera above the competitors. This will give an even more detailed view of the performed stretch. Perhaps this is possible at the 2013 Worlds. (Teamtrainers, who did produce the video material will try to find a possibility). If yes, the material could be used at the next seminar.

Discussed items; which occured during the past season

- Passage** Saddle touches the competition area. It is possible this occured due to „unsteadiness“. The commissaires will decide yes/no because of a devaluation. If yes, it will be according Mistake group 12.6.1a (x or ~)
- Passage** Raiser regular seat raiser handlebar seat
The exercise did not start; devaluation: 100%
This exercise starts at the moment the position raiser regular seat is left.
All other devaluations according rule 8.6 (Difficulty) „Stretch“.
- Passage** Raiser handlebarseat raiser headtube
Due to the fact that the stretch between the start and end positon is very short it is very difficult to judge it. But anyhow a devaluation must be basicly executed also according rule 8.6 (Difficulty) „Stretch“.
- Turning jump**
The rear wheel lifts during performing the exercise.
It is possible this occured due to „unsteadiness“. The commissaires will decide yes/no because of a devaluation. If yes, it will be according Mistake group 12.6.1a (x or ~)

Pair; mill single rings

One of the two competitors does not leave the 4 metre circle as obligated (see rule 3.2.10; Guidelines for performance in the riding area single and pairs). Devaluation according rule 8.6 (Difficulty) „Stretch“: „Must be entirely shown by all competitors“. In this case devaluation; 100%.

Eight (8); diameter

Performing an eight both circles must have a minimum diameter of 4 metres. The stretch will be judged (also when the stretch is not completed) based at the distance which is performed with a minimum diameter of 4 metres. Devaluations according rule 8.6 (Difficulty) „Stretch“.

Not equal distance towards the centre of the circle (minimum diameter must be always 4 metres) or displaced circles will be devaluated according rule 12.6.2 (Performance) with a „wave“.

Double circles (teams)

The circles at double circles must all have a minimum diameter of 4 metres. Will be a part of double circle performed with a diameter less than the obligated diameter of 4 metres a devaluation should be made according Rule 8.6 „Stretch“ (Difficulty).

Side kneeling foot cracking

See remarks at report on behalve of the 2007 Commissaires Seminar.

ACT4 Doorings

Regarding position of arms at „freehanded“ see remarks at report on behalve of the 2008 Commissaires Seminar.

Mills

„Mills“ are exercise which „moving“ (have to be performed „riding“). Devaluation should be according Rule 8.4 „Start of an exercise“ for Pairs and Teamriding (Difficulty).
End of exercises for pairs; Rule 10.7 (Difficulty pair) and Rule 3.2.8 „Mills“ (Guidelines for performance in the riding area single and pairs).
End of exercises for Teams; Rule 11.1 „Synchonocity“ (Judgement difficulty Teams).

Stradles

Often stradles are performed with an opening angle of the legs less that 70 degrees. As guideline the feet should be as wide as a „double handlebar width“ (minimum).

Swiss Handstand

When the legs are not stretched from the start (for ex. at 1124j) there will be a devaluation of 100%. At exercise 1124f the stretch during „going up“ is not an obligation. If the legs are not stretched during „going up“ (passage from L-shape hold to handstand at 1124j, basically the wrong exercise is performed.

To give a devaluation in this case, „x“ or „~“ according Rule 12.6.1.8 (Performance) is not possible !

Final exercises

See remarks at report on behalve of the 2010 and 2011 Commissaires Seminar.

Stopping the judging/time because of injuries or bicycle damages

See also remarks at report 2009; Commissaires Seminar.

An injury or bicycle damage (stop of time) should be done by the competitor or by the trainer/person who is present within the coaching zone towards the Chief commissaire.

At the moment of continuing (adjusted with chief commissaire) after the time-out the competitor will call „start“ to start the time again.

Fronthandlebarstand pair tactical (for ex. 1 handlebar turn tactical)

Competitor 1 performs a total turn.

Competitor 2 performs 1 ½ turn (so 1 turn extra as tactical)

In this case the tactical points for 1 extra turn (only 1 rider) will not be given !

Uni-cycling From 01-01-2013 some rule changes will be valid. These can be found on the website www.kunstradreglement.com and www.hallenrad.eu .

Report UCI Commissaires Seminar

This report and all earlier reports can be found on, and downloaded from the UCI website www.uci.ch (Commissaires extranet) and the website www.kunstradreglement.com

2013 UCI Commissaires Seminar

A preliminary reservation was made, again at the Frankfurt Sportcentre, for the weekend 14-15th dec. 2013
